

## **No Scent Policy**

### **PURPOSE:**

The Marathon Family Health Team understands that a number of patients, particularly those predisposed to migraine or undergoing Chemotherapy treatment, have sensitivity to particular scents or odors in their immediate environment. Such scents have the effect of triggering a migraine or inducing nausea or vomiting as the patient waits for their scheduled appointment.

### **POLICY STATEMENT:**

The Marathon Family Health Team would appreciate all staff and clients refrain from using perfumes, cologne, personal body fragrances and scented hair products while working at or frequenting the medical clinic to ensure the comfort of all persons attending appointments at the clinic.

Thank you for your cooperation.
